

## REMARKS

The claims have been amended to call for three sigma-bonded moieties. It is not clear that there are even two moieties in compound II-18 in Kodama. But, most certainly, it is beyond dispute that there are not three sigma-bonded entities coupled to the base atom. Therefore, reconsideration of the rejection of claim 1, as amended, would be appropriate.

Respectfully submitted,

Date: October 5, 2005
